

GREENline

Green soul in trendy design

AVAILABLE FROM FEBRUARY 2021 **NEW**

The mark of responsible forestry

www.herlitz.eu

Our new series GREENline can be both beautiful and sustainable and it embodies a clear stance without preaching.

- Responsible use of natural resources, the protection of the climate and biological diversity are becoming increasingly important in our globalised world.
- **Environmental protection and sustainability are the key concepts as we move forward into the future** and will continue to be among the most important topics.

- In addition to wanting products of high quality, consumers increasingly expect **environmentally sound products** – all the more so if they are going to be used by children and young people.
- The range aims to offer our target group the opportunity to actively make the choice for sustainability on a daily basis through our products.

- This series should not only stand out because of the **sustainable and certified materials used**, but also score points with their appearance:
 - **recycled paper** can be white and smooth,
 - **recycled plastic** can shine with bright colours,
 - and a “green” product range can be bursting with great designs.

- Two recognized (and very well-known) environmental quality certifications have been established in our industry to ensure the consumers' need for environmentally-sound items is met and to make it possible to offer them the best possible guidance in this respect: the **Blue Angel and the Forest Stewardship Council™ (FSC™) logo**.
- Launched in 1978, the **Blue Angel** is the world's first and oldest certification for products and services that have environmentally friendly aspects and is considered particularly **reliable for consumers**.
- Wood or paper products are labelled with the **FSC logo** whose raw material comes from **well-managed, FSC-certified forests and other controlled sources**.
