**SPECIAL EDITION**

**Souverän® 800 Green Demonstrator**

Experience the return of the fountain pen Souverän 800 Green Demonstrator with our new Special Edition! This apple-green fountain pen with demonstrator properties brings positive energy to every fountain pen collection. Some collectors will recognize this extraordinary pen as it reminds of its predecessor from 1992. However, the new edition is not identical to the fountain pen from the 90's. The new details make it a real eye-catcher. A special mention deserve the one-piece cap ring and filling knob ring with shiny and satined surface optics, giving it an extraordinary look.

As usual, the fountain pens of this Souverän series M800 Green Demonstrator are made of high quality components. The rings and the traditional beak like clip are finished with 24-karat gold and the 18-carat bi-color gold nib with rhodium decor crowns the fountain pen. The green-transparent parts allow a view on the ink level and the piston mechanism. The Souverän series is available exclusively as a fountain pen, with a choice of EF, F, M or B nib widths. The pens are supplied in a gift box (G30).

As a suitable companion we recommend the Edelstein Ink Aventurine. The Special Edition series Souverän 800 Green Demonstrator will be available from mid of April 2023.
