## From yogurt cup to ink eraser

1

in Germany

www.pelikan.com

#### Our eco products made of recycled plastic

#### Made of recycled plastic

Our eco products are mainly made of recycled plastic - depending on the product category at least 65 % to 95 %. This is post-consumer waste (PCW): Plastic that has already been in use by the end consumer (e.g. as yogurt pots, computer keyboards or kitchen appliances), is given a new use in our products.

The content of recycled plastic is shown on our products in the Pelikan recycling seal. This is only awarded to products that contain a minimum content of 50% recycled plastic and that we manufacture in our factories or have certified according to the Global Recycled Standard (GRS). Our recycling seal indicates that we source certified materials from certified plastic recyclers and monitor material origins and sourcing to ensure the minimum reported recycled plastic content.

The recycled plastic for the K12<sup>®</sup> eco, the K24<sup>®</sup> eco and the Twist<sup>®</sup> eco comes from consumer goods (such as electrical appliances, computer accessories, kitchen appliances, etc.). For our ink erasers, ink pen cartridges, highlighters and water cups, on the other hand, the recycled plastic is obtained via the Green Dot and comes from the yellow bag or yellow garbage can (e.g. from yogurt pots and plastic packaging, etc.). The processing of all recycled plastics used takes place in Europe.

#### Each product is unique

The color of our eco products may vary slightly due to production. Material structures give the products a special authentic charm. While the Twist® eco has a subtle marbling that gives the gray pen a trendy exposed concrete look, for example, the Super-Pirat® eco has a speckled look. In K12® eco and Super-Pirat® eco, the light plastic components are light gray instead of white.

Sustainable from product to retail packaging For us, sustainability does not stop with the product. For all eco products, we have chosen sustainable sales packaging - cardboard from responsible forestry or recycled plastic, depending on the product.

# K24° eco

Available from January **2024** 

### NEW

#### This is how painting becomes more sustainable

The K12 eco gets reinforcements: In the K24 eco with **24 bright premium opaque colors,** all plastic parts are made of 95% **POST-Consumer recycled material,** just like in the K12 eco. The opaque paint box for environmentally conscious families who value high-quality, bright colors.

7,5 ml opaque white tube

## High demand due to major PR and social media campaign

The new eco advertising campaign 2024 achieves many millions
of contacts in social media and in consumer magazines with an affinity to the target group.

TikTok, Pinterest, Instagram and Facebook are generating interest, increasing awareness and fueling retail demand.

The highlight during the BTS period June – September is a big contest on TikTok.
