Fibre-tip pens

Never stop
colouring

Terminology

Washes out with water.

Formula has **no dangerous** substances that could create any harmful reaction if ingested or inhaled.

Tip that allows you to draw thin (0,6 mm) lines.

Includes a ventilated cap to meet **ISO 11540** standards: Specification for caps to reduce the risk of asphyxiation.

Product **unsuitable for children** that are younger than three years old.

Assortment with a variety of **intense colours**.

Product includes a tip that allows to draw **two line widths**.

QR Code scan to explore additional content of each product. Included in packaging.

Fibre-tip pens

Why Pelikan fibre-tip pens?

Wide variety of intense colours in water-based washable inks. One of the widest available in the market.

Colorella Star is the perfect companionship for school and leisure!

We live in a world full of colours that motivate us to create great things; with colours we express our ideas, feelings and personality. Colouring our ideas is key to turn those thoughts into actions, colours allow us to communicate with others and even to have fun with them. Imagine having the perfect tool to create a colourful day, everything is possible now with our great Colorella® assortment.

From fibre-tip pens to colour the little details in life to a bolder felt pen to cover it all, the Colorella® assortment has the perfect coloring instrument for you. Each marker will adapt to your needs.

Use our brush pen to expose the artist inside of you, go beyond the regular paper and explore other surfaces with our textile marker. Colorella® offers a wide array of line widths, shapes and bright colors to highlight what matters most to you. Colour is life, enlighten your creativity with Colorella®!

What types of fibre-tip pens does Pelikan offer?

Colorella® Star C 302

Be the Star of the classroom with Colorella® Star fibre-tip pens. Create colourful drawings and let your creativity soar.

Colorella® C 302 Pastel edition

Turn your notes into sweet and trendy drawings with our charming Colorella® Star Pastel edition. Six cute pastel tones that will inspire your imagination at first sight.

Colorella® C 303 Triangular

Ergonomy at your hands. The Colorella® Star fibre-tip pen also comes in a triangular shape body, which provides a better grip for children's hands.

Colorella® Duo 407

Take your creativity to the limit with Colorella® Duo fibre-tip pens. Save time and space with its two types of tip. Create incredible shapes and lines in your drawings and school notes.

Colorella® Twin C 304

Be the king of colour with Colorella® Twin fibre-tip pens. A rainbow of colours at the palm of your hand. This multi-skill set of pens features 10 double sided colours and tips. This equals 20 different colours to choose from. Take advantage of its two types of tips to create incredible shapes and lines in your drawings and school notes.

Felt pens

What is the key of a felt pen?

An effective felt pen should have high ink flow to produce smooth, even lines. Its colours should be highly saturated, which can create bold, bright art projects.

Its tip size and form determinates the width of the lines it creates and therefore the uses that each type has as colouring, text, lettering, etc.

What types of felt pens does Pelikan offer?

Colorella® Magic

Felt tip pen with changing colour ink.

Colorella® Pastel

Felt tip pen with charming pastel tones.

Colorella® Metallic

Multi purpose felt tip pen with ink permanent on porous surfaces and erasable on non-porous surfaces. Create metallic effect on drawings.

Colorella® Textile

Felt tip pen for textile applications. Machine washable resistant and durable ink application.

SCHOOL

Geometric Sets and rulers

Smart
homework

Geometric sets and rulers

What is the key of a good geometric set?

A correct scale of measures which allows the student to trace the right shape and a straight cut to draw straight lines as requested.

Also a resistant material to avoid breaking with falls and hits.

What types of geometric tools does Pelikan offer?

Rulers

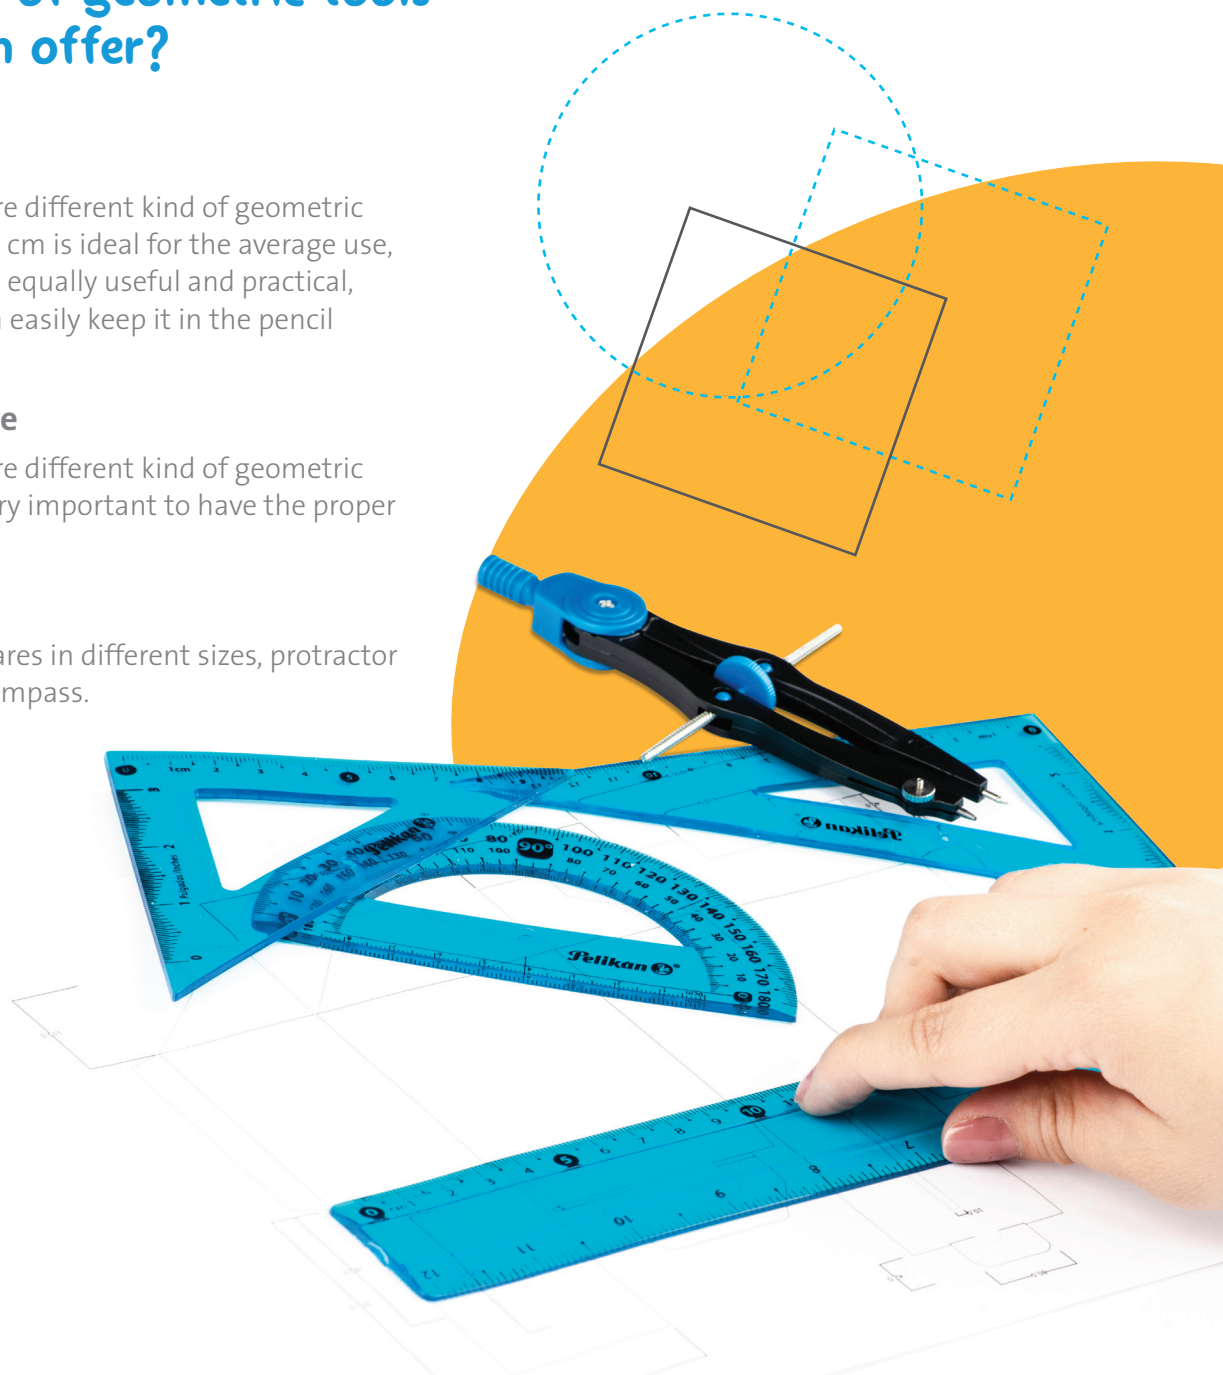

To trace and measure different kind of geometric shapes in school, 30 cm is ideal for the average use, but smaller sizes are equally useful and practical, and the student can easily keep it in the pencil pouch.

Geometric Square

To trace and measure different kind of geometric shapes in school, very important to have the proper angles.

Geometric sets

Set with rulers, squares in different sizes, protractor and occasionally a compass.

Terminology

20 cm is the total length of the drawing instrument.

30 cm is the total length of the drawing instrument.

13 cm is the total length of the drawing instrument.

18 cm is the total length of the drawing instrument.

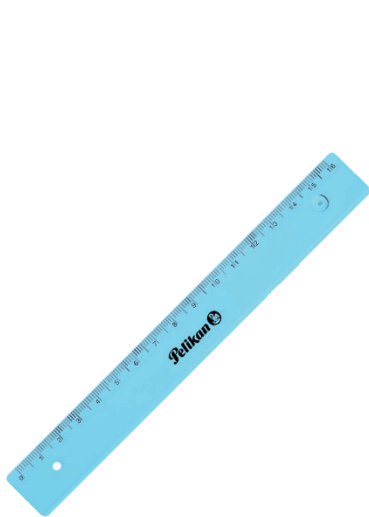

Ideal for children who need a **very resistant and safe** tool to work with.

Practical and **unbreakable** material.

CERAMIC
PORCELAIN

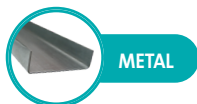

CARDBOARD

GLASS

RUBBER

METAL

LEATHER

STONE

Why PVP Glue sticks?

PVP
Formula

PVP provides more stable adhesion, is a safe substance to kids use as it doesn't cause any toxic reactions if inhaled or absorbed.

Gluing

What is the difference between Solvent vs Solvent free?

For solvent base adhesives, resins are dissolved in solvent to produce a tacky polymer solution, which can be extremely adhesive when polymer dries, and solvent evaporates. As for solvent free adhesives, natural compounds like cellulose or polyvinyl acetate (PVA) are dissolved in water or organic based solvents to provide the same adhesion qualities.

What types of glues does Pelikan offer?

Glue sticks

Made of a solvent free, PVP based formula, our glue sticks provide smooth dry application.

Craft glue

With a PVA based formula this is the most commonly used glue for kids. Used in handicraft activities, this non-toxic glue is the best choice to small kids to use for multiple activities.

Paper glue

With a PVP based formula our solvent free paper glue provides a quick dry application to paper and cardboard surfaces with no residues and no wrinkling.

All-purpose glue

With a PVP based formula our solvent free universal glue provides effective adhesion to a wide range of surfaces with effective performance.

Super glue

The strongest adhesive with a MCA based formula, used to instantly glue the most tough surfaces like metal, ceramic and porcelain.

WRITING

Ballpoint Pens

« Everything flows
better by writing »

Terminology

Gel ink.

Semi-gel ink.

Oil based ink

Triangular body shape.

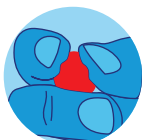

Midpoint (0.7 mm).

Midpoint (1.0 mm).

Soft writing.

Grip zone.

Ballpoint Pens

The concept of using a "ball point" within a writing instrument as a method of applying ink to paper has existed since the late 19th century.

A ballpoint pen, is a pen that dispenses ink (usually in paste form) over a metal ball at its point, i.e. over a "ball point".

Pens can be classified into different categories:

Point

Fine or medium, that is, the thickness of the writing.

Durability

Disposable or rechargeable.

Opening mechanism

Lid, push button/retractil or twist.

Ways to call a pen:

Ballpoint pen, pen, ball pen, birome, biro, plume, sphero, spherographic caneta, caneta etc.

Inks:

- Gel ink
- Semi-gel ink
- Oil-based ink

Ballpoint Pen

Stick super soft

Stick super soft

Highlighters

Women are constantly looking for products that allow them to express themselves in a unique way on a daily basis.

For them, pastel colours are an ideal complement, inspired by the feminine inside them and **a trend that is here to stay!**

Signal pastel is not just a highlighter, it is an alternative to explore the creativity of the feminine gender, making it a must to bring them with you in your school bags, backpacks, handbags and desks...

Target: Women from 15 to 30 years old.

We believe: Women need products that make them feel safe and in trend...

We exist to: Be part of every moment no matter how small it is.

Values: A quality product that connects with the female audience. Assortment with 10 colours, good performance and ink flow.

Highlight what matters:

To remember what is important.

Gel Pen

These writing instruments use a special type of ink that becomes invisible when heat is applied. To generate the necessary heat, an eraser is rubbed on the paper, this heats up the surface and activates special chemical compounds present in the ink and these molecules, when activated by heat, uncouple the pigments of the ink and make its line invisible.

Erase 2.0[®]

Erase 2.0 writes smoothly like a regular gel ink pen, but lets you erase like a pencil at any time. Repeatedly write, erase, and rewrite without damaging your papers.

It is focus on young people and those times in school when they are subjected to long hours of study and rhythm of work does not allow them to make mistakes.

We believe, we contribute to their performance in a unique, positive and fun way if we provide products that teach them that making mistakes is valid because it helps them to improve again and again everything that comes to mind.

Pencils

A pencil is a writing or drawing instrument consisting of a lead or stick of pigment (usually graphite and a special grease or clay . It can also be colored charcoal pigment) and generally encapsulated in a cylinder of fine wood, but also in plastic, paper and metal wrapping.

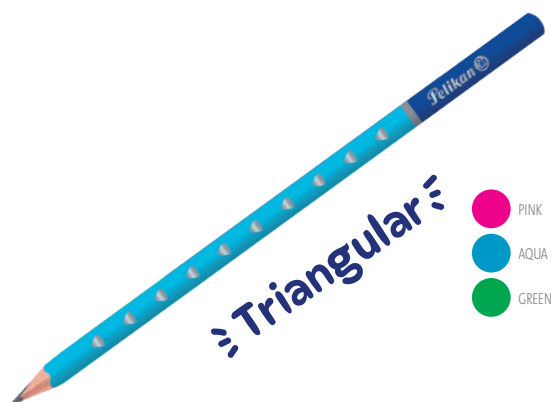

A pencil that has a lead made of more clay mixed with the graphite is a stronger pencil. They differ, on the one hand, with the letter H (from English hard = hard) and B (from English black = black), and, on the other hand, with a number from 1 to 4, with the number 4 being the hardest. There may also be combinations of the letters.

Graphite pencils are one of the most important tools at school: For learning to write , for geometrics as well as for the technical and artistic drawings.

Pelikan Silverino graphite pencil is a real eye-catcher.

ERASING & CORRECTION

Erasers

≧ Clean & Soft ≦
erasing ≡

Terminology

EN71 is a European certification that guarantees that our products are suitable for use by children.

PVC is a highly polluting material and Pelikan erasers are made with biodegradable substitutes that are environmentally friendly.

At Pelikan we use **synthetic latex** that prevents the consumption of products from trees such as rubber.

Sliding band helps your eraser to always stay clean inside your case.

Protective cellophane keeps the eraser clean and dust-free at the point of sale or display.

The ergonomic shape of the rubber makes your erasing more comfortable and precise.

Canister presentation allows content to be sealed and protected but visible at the point of sale.

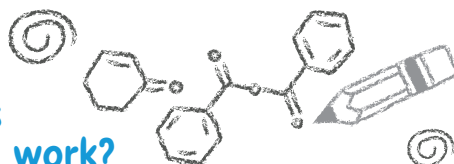

Why PVC free?

PVC is a highly polluting type of plastic. Our erasers are made with environmentally friendly substitutes that do not contain that type of resin.

Erasers

How does the pencil work?

When we write with pencils on a paper, the coal of the mine remains fixed to the surface of the sheet because of the adhesion force, which is an electromagnetic force that operates between the molecules of the different bodies that interact.

How does an eraser work?

Erasers use a simple trick: the material they are made of has a higher bond strength than paper, so it pulls the carbon towards itself. In addition, the base substance of the eraser is mixed with carbonates and vegetable oils that help to remove dirt particles.

What is difference between the types of erasers?

The difference between them is precisely the material from which they are made; in Pelikan we have plastic erasers and rubber erasers.

Plastic erasers

Are made of resins that give them a harder consistency and therefore have more adhesion and firmly remove graphite, which is why it is recommended to erase traces of hard mines, such as those we generally use to write, with which we obtain a clean and precise erase!

Rubber erasers

Are made of resin but they contain a different ingredient called synthetic latex, which give them great softness, so they are recommended for erasing smooth strokes such as those in a drawing or sketching and you can also comfortably erase on large surfaces, getting a smooth and clean erase!

Correction

« Make re-think possible »

Terminology

Fine metal tip.

Brush tip.

Tip cover.

Correction tape.

Formula **free of chemical solvents** making safe to handle and no toxic.

Main ingredient in the formula may cause allergic reactions and eyes, skin and respiratory irritation.

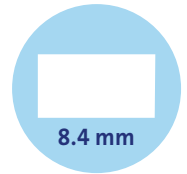

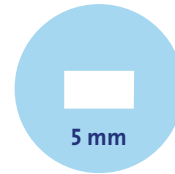

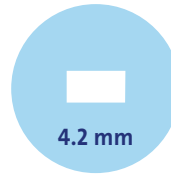

Contains **substances** with **aquatic toxicity**.

Contains **flammable** liquid and/or vapour.

Contains: Methylcyclohexane, Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist. Flammable liquid and vapour. Causes skin irritation. May Cause drowsiness or dizziness. Toxic to aquatic life with long lasting effects. Keep out of reach of children.

What does Pelikan offer in dry correction?

Pelikan offers 3 different correction tape band widths for you to pick the one that fits better the correction you need, whether it be fixing small mistakes in your notebook, some forms you use at work or more complex broader lines made by complex writing styles you will always find one that fits your needs.

Correction

What is the key of a good correction article?

An effective correction is characterized by a smooth application, the key substance allow to have a white canvas to write with no shade or remains of ink. White correction items have the best outcome when the paper has a white tone close in tone to the correction fluid or tape creating a seamless fix.

What types of correction does Pelikan offer?

Liquid correction pens

The fine metal tip allows for a precise fix over fine lines and detailed traces like numbers, symbols and detailed letters.

Fluid correction

The brush allows different levels of pressure to create a variety of widths to fix big mistakes in writing, lettering, symbols and even images.

Correction tape

Dry correction tape, no time lost, just apply and write over it. Correction tape provides no shade, high brilliant white canvas with no margins to write. With a smooth mechanism and 3 tape widths. Pelikan correction items allow for a precise and smooth linear fix of words, numbers and traces in any ink colour.

Carbon paper facts

What makes Pelikan's carbon paper the best option?

Our products have non-toxic, natural based components and FSC Certified paper which assures our costumers that our products come from responsibly managed forests that provide environmental, social and economic benefits.

How to differentiate between handwriting and typewriting carbon paper?

As an overall worldwide rule all blue inked carbon paper is hand copy use and all black inked carbon paper is used for typewriting machines.

What makes a quality carbon paper?

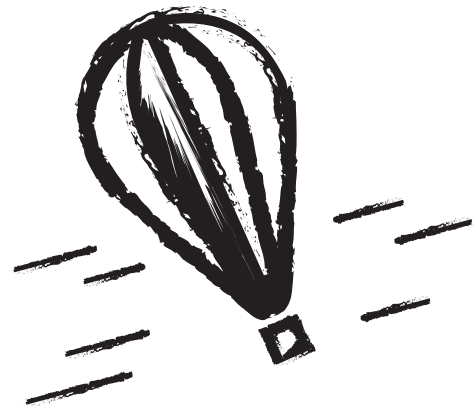

A high-quality carbon paper must have a formula which is specifically design for its use:

For handwriting

The formula is softer and allows for an easy use to perform hand imprints with different types of hand tools or writing accessories like pens and pencils with have different nibs and point widths.

For typewriting

The formula is of a harder nature, usually design to hold the focus impact point created by a typewriter type point.

Stamping

What makes a quality stamp?

A high-quality stamp is achieved when the stamp has good defined texture that makes a clear and distinguishable print of all elements, letters and images.

But a good stamp is nothing without a high-quality stamp pad and stamping ink, it must have the optimal formulation to allow good covering capabilities, quick drying to avoid the ink to spread in surfaces creating unreadable impressions and solid color to allow a high number of readable imprints.
